

RURAL HEALTH CLINICS

Improving care with Azalea Health's easy-to-use innovation

Azalea Health's certified EHR with integrated Practice Management, Telehealth, RCM and billing services is the heart and hub of community health systems and clinics. With Azalea's easy-to-use, comprehensive clinical and financial solution, you spend less time charting and coding and more time delivering quality care in your community.

Technology-enabled healthcare solutions and managed services are particularly important to ensuring equitable access to quality healthcare in rural settings. Azalea brings deep experience in working with rural providers and organizations, offering specialized rural health consulting and other professional services.

Rural health providers and health systems can tap into Azalea's experienced team for assistance in obtaining rural health clinic (RHC) certification and compiling policies, regulatory compliance and guidance, implementation of policies and procedures, optimization of in-house workflow, coaching for unique RHC billing procedures and much more.

Best of all, the certified Azalea® EHR and PM are FREE with Azalea® RCM medical billing services.

Why Choose Azalea Health®

- **Customized software** to accommodate RHC billing.
- **True cloud-based technology** means there's no hardware or software to manage, and you can work from anywhere using any browser.
- **Meet HIPAA requirements** with encrypted documents, secure messaging and online bill pay.
- **Use custom forms** or adjust an existing template from the library.
- **Meaningful Use dashboard** enables practices to monitor physicians' status.
- **Simple SOAP notes** generation improves workflow and is easy for physicians to use.
- **Collaborative Charting™** enables your team to work on the same chart simultaneously.
- **Automatic updates** of CPT, HCPCS, ICD-9 and ICD-10 code sets at no additional charge.
- **Comprehensive reporting** lets you generate detailed, customized demographic and financial reports.
- **U.S. developed** with U.S.-based support and training.
- **Fully integrated telehealth** increases accessibility and convenience by supporting patient consultations and collaborations between care providers.

INNOVATION. PARTNERSHIP. LEADERSHIP.
